

# BIO-REGENPONCHO®

The certified bio rain poncho is made out of genetically-free corn starch, and is therefore 100% biodegradable & compostable. Rain poncho and printing colours according to the European Standard EN 13432, with the OK Compost quality seal. Within a few weeks (8-12) 100% biodegradable (CO<sub>2</sub> neutral) by decomposing into naturally occurring, renewable and non-toxic products.

milky white

- Minimum quantity:** 1,000 pcs.  
**Material:** Corn-starch (mater-bi®)  
**Thickness:** 0,025 mm  
**Size:** 115 x 110 cm or 127 x 102 cm (W x H)  
one size fits all adults  
**Weight:** 85g  
**Packing unit:** 16 x 11 x 1 cm  
**Ground colour:** milky white  
(ground material should not be dyed;  
leads to loss of product attribute)
- Printing colours:** up to 8 colours  
**Printing method:** flexo print  
**Print positions:** front and/or back  
**Printing size:** standard max. 30 x 30 cm (possible  
up to 90 x 90 cm for additional costs)  
**Printing data:** given by customer  
**Initial printing costs:** included in price  
**Packing unit:** 1pc. in a sealed bag made from  
corn-starch / 100pcs. / carton
- Carton meas.:** 55 x 33 x 11 cm  
**Weight:** N.W.: 8 kg / G.W.: 9 kg  
**Delivery time:** 4-5 weeks air freight  
10-11 weeks, sea freight  
**Info:** quality seal "OK Compost" can be used  
free of charge for promotional purposes

#### Optional:

- kids size or other individual sizes
- material thickness: 0,025 - 0,1 mm
- gravure print
- hood-cords made from mater-bi® or cotton
- sleeves can be added (with or without elastic band)
- print on sealed pouch (max. 8 colours), recyclable paper inlay (4 colours offset print)

For the love of nature -  
A piece of nature!

Made from genetically-free corn starch. Rain poncho and printing ink according to the European Standard EN 13432, with the OK Compost quality seal. Within a few weeks (8-12) 100% biodegradable (CO<sub>2</sub> neutral) by decomposing into naturally occurring, renewable and non-toxic products.

## THE BIO RAIN PONCHO MADE FROM CORN STARCH

100% biodegradable & compostable

- 🌿 Rain poncho with hood
- 🌿 One size fits all adults
- 🌿 Size: 115 x 110 cm (W x H)
- 🌿 Thickness: 0,025 mm
- 🌿 Breathable & light
- 🌿 Tear resistant & reusable

I AM MADE FROM  
CORN STARCH AND  
A PIECE OF NATURE.  
You see it. You feel it.  
You smell it.

# BIO Regenponcho®

## ADDITIONAL INFORMATION BIO-REGENPONCHO®

The BIO rain poncho made from corn starch not only protects reliably against rain, but is also a sustainable, environmentally friendly and breathable material alternative to the usual PE disposable rain poncho, which is made from conventional plastic, based on the fossil raw material petroleum. The certified organic rain poncho, on the other hand, is made out of the also certified corn starch - „MATER-BI“.

The corn starch is obtained from the renewable and non-genetically engineered raw material corn, which is grown in Europa under strict regulations.

MATER-BI is a granulate obtained from the Italian company Novamont, the pioneer in the field of bioplastics with over 800 sponsors and various awards.

The BIO rain poncho is fully biodegradable and compostable under composting conditions, within 8-12 weeks. The process is carried out with the help of micro-organisms, so that only water and compost remain. Even a degradability of MATER-BI made products in the sea has been tested and confirmed. The degradation time here is 34-38 weeks. Whether composting or burning - the BIO rain poncho biodegrades CO<sub>2</sub> neutrally.

The 100% biodegradability and composability of the BIO rain poncho, as well as the used print colours, is confirmed by the seal of approval „OK Compost“, issued by the world-renowned institute Vinçotte in Belgium. The test method of the quality seal is based on the European standard DIN EN 13432. The printing of the quality seal on the poncho, the packaging or the paper inlay is allowed to be used at your disposal.

Like the classic PE rain poncho, the BIO rain poncho is light, durable and can be used several times. Compared to the PE poncho, however, it is breathable / water vapour permeable. Which means that you won't work up a sweat in the BIO rain poncho!

The BIO rain poncho can be stored in a dry and cool place for up to 2 years.

For printing, flexo- and/or gravure printing, also certified water-based inks are used, so that an overall ecological product can be offered.

By default, the BIO rain poncho is packaged in a sealed shut bag of the same material. The bag can also be printed or complemented with an insert of recycled paper, which can be sealed in this bag.

- **breathable**
- **naturally renewable material**
- **100% biologically compostable and degradable**
